TRAYS FOR SALE
Geo. E. Hyde & Co. — Phone 34J

The Misses Leta and Evelyn Brown of Boulder Creek are visiting with their friend, Miss Ruth Hayes.

Chas. White who underwent a serious operation Sunday at Columbia hospital is reported doing fine.

Messrs. and Mesdames J. P. Beall and J. McVea motored to Carmel Tuesday for a vacation at the seaside.

J. D. Sawyer and sons, Roy and Verne went to Capitola on a fishing trip Sunday. J. D. caught the only salmon, landed there that day.

Miss Ruth Lloyd was brought home from Pacific Grove Tuesday, Mr. J. C. Ainsley bringing her from the San Jose depot. She stood the trip well and we are pleased to report her improving.

"Shower" Given

Miss Elizabeth Sargent and Mr. George Parso were the honored guests at a most delightful shower party at the home of Mr. and Mrs. Frank Cutting of Hamilton avenue, Friday evening. The hostesses were Mesdames Frank Cutting, W. R. Coupland, A. S. Collins, and F. J. Bohrman, Jr.

The decorations were in green and white, with pepper boughs and marguerites tastily festooned about the screened porch which served as a refreshment booth. Miss Belle Ricker and Mr. Gordon Mapes acted as servers, drawing the punch with an old-fashioned moss-covered well and sweep. Stanley Smith, true to his cake capacity won the cake naming contest, Gordon Mapes taking consolation. Miss Sargent won first prize a hand painting by Frank Cutting in "A Shakespearian Romance," Mrs. A. B. Townsend second, a glass paper weight, and Mr. Parso the little toy watch dog.

Mr. Mapes sang "Four-Leaved Clover" and "Perfect Day."

The shower was made in the form of a huge pie filling a tub. When the pie was cut the display of gifts, paintings cut glass, china and linen made a pretty sight.

The wedding of this popular couple will be solemnized next month.

Local and Personal

Quality stationery at Smith's.

Mike Scott and Rodney Edwards were among the bathers at Capitola.

Born: To Mr. and Mrs. E. Lisle Keesling, a daughter, July 16, 1916.

George Parso motored to Santa Cruz Tuesday for a bake in the sea sands.

The G. M. Ellison family was enjoying the breakers at Capitola beach Sunday.

The W. L. Douglas and other good dress Shoes for Men $3.50 and $4.00 at E. E. Sower.

Quite a number turned out to the union service Sunday evening to hear the sermon for the baseball boys.

Misses Helen and Marjory Duncan are guests of the Misses Marion and Alice Duncan at Capitola this week.

Grandmas Atkinson and Sherer, and Calista Atkinson went to Santa Cruz Monday for a week of sea siding.

Miss Marguerite Clemens made a hurried visit here this week before leaving for a two week's vacation at Doris.

Miss Grace Bohnett was taken to O'Connor sanitarium Sunday, for treatment. It is hoped she may not need an operation.

Clyde Phelps is here from Modesto for a two week's visit with his uncle and aunt, Mr. and Mrs. Geo. Phelps, of Hamilton avenue.

Mrs. F. E. Duncan and four older children motored to Capitola Sunday arriving in time for the "big eats" at the Duncan-Carter rendezvous.

Mrs. Claud Gard went to Rodeo, Saturday for a visit with friends. Monday afternoon she conducted a recital of her piano pupils. She was accompanied by her daughter, Lilian.

A. E. Sargent and D. W. Waite went Tuesday to Santa Cruz and other coast points for a two week's outing. They will simply do the sights and get all that's going. Leave it to them.

The Rev. G. E. Atkinson attended the regular meeting of County C. E. Executive Committee at San Jose, Monday evening. At his invitation the next meeting will be held at the Manse, Aug. 21.

A. C. Keesling who returned last week from his trip south, suffering with a painful disease in the knee, is reported slowly improving. The entire party returned with him, having gone only as far as Fresno.

Mesdames L. F. Shaw, Geo. N. Stray, Walter Stray and G. E. Atkinson, and Dr. C. N. Cooper leave tomorrow for Yosemite as delegates and alternates to the California Congregational Conference. Rev. G. E. Atkinson will go Monday.

Bert Campbell has received word from Lloyd Gardner, who went to Nogales, Arizona, with the soldier boys. Lloyd says he has already had preliminary trench work digging drain trenches about the tent to keep out the water. They expected to go on border duty Sunday. He is enjoying the work thus far and the "chuck" is good.

Mrs. Alex Adam was tendered a farewell party at the Manse Friday afternoon. The time was spent in conversation and music, singing many of the old songs that all love so well. Mrs. Adam and children left Wednesday for Portland where they will make their future home. Campbell loses two of its best singers in the removal of Mr. and Mrs. Adam.

Prune and Apricot Growers

This is the age of preparedness, and on every hand we hear the cry, the country is unprepared. In New York, Chicago and other Eastern cities hundreds of thousands of American men and women have marched, while millions of others have stood for hours watching and on July 22 the whole state of California will hold a monster parade in San Francisco, and just why are these millions of American men and women parading?

It is the simple reason that they are appalled at the awful calamity of Europe and they are demanding that America be amply prepared to protect the homes of all her citizens and insure a continuation of peace, happiness and prosperity.

And now Mr. Prune and Apricot grower the Cry of "To Arms, To Arms!" has gone out to all your clan and you are called to the colors. You say; "what are we called for?"

The answer is the same as the other, to insure a continuance of peace, happiness and prosperity. You have nearly a hundred million Dollars invested and the time has come when you must combine to market your products yourselves, for the simple reason that, the Raisin, Peach, Almond, Walnut, Orange and Lima Bean producers have organized and are controlling their own business and now the Greatest of all green fruits the apple is organizing to control and expand their Markets and if the prune and apricot grower wishes to hold what he has and expand, to care for the increase of his crops he must organize and *at once*.

It will not do to wait; you have had good crops and fair prices for a few years and you now have a surplus of money. The great law of nature has always been the survival of the fittest, a hint to the wise is sufficient.

A meeting will be held Tuesday night, July 25 at 8 P. M. at Odd fellows hall under the auspices of the Grange in Campbell and all prune and apricot growers are urged to come and help to make this meeting a record breaker.

Meetings have been held in Milliken Union, Moreland and Cambrian and many growers have signed the voting trust agreement, and now it is your turn, come out and add your strength to the ball and give it a big share to the next meeting.

It is like a small snow ball started at the top of a mountain, as it rolls down it gathers snow and increases until it finally becomes an avalanche and carries everything before it and so must you prune and apricot growers add your strength to the movement which means your success.

California Industrial Record

San Francisco—Local shoe firm awarded contract to make 50,000 shoes for $200,000.

Proposed bridge across San Francisco Bay will be 5½ miles long, consist of 85 double-deck spans and cost $22,000,000.

Palo Alto—Dr. Shumate will build $40,000 residence near Los Altos.

Van Nuys will have $22,200 municipal building.

El Centro—Campaign started here in interest of hog industry.

Santa Ana—Odd Fellows will spend $5,000 to improve building. $20,000 improvement planned at Fullerton High School.

San Bernardino to have $70,000 Post Office building.

Yreka schools to have $13,553 gymnasium and domestic science hall.

Red Bluff—Corner stone for new high school laid here.

No Sore Feet

Washington, July—That United States Marines suffer little from foot troubles on long hikes in the tropics, is attributed to the fact that they invariably sprinkle soap powder into their shoes, or soap their stockings just prior to the march, according to a naval surgeon just returned to this city from Haiti.

In the Haitien campaign the United States Marines were sometimes forced to march thirty or more miles a day, over rough mountainous roads, and the cases of blistering, or painful swelling of the feet, were almost negligible.

B. O. Curry and family went to the beach Monday for an outing. Misses Oiva and Ethel start with friends today for a visit to Yosemite.

H. Earl Williams and Miss Merle L. Isbell were married Saturday by the Rev. W. F. Lloyd at the Twentieth-St. M. E. parsonage, San Jose. Both young people are well known here. At present they are living at the Isbell home in Campbell. Mr. Williams is a boxmaker at the Geo. E. Hyde packing plant.

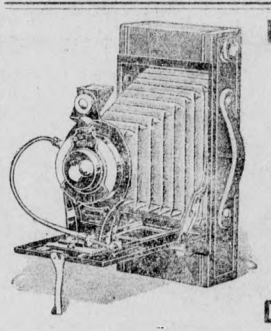
Blaine's GENERAL MERCHANDISE — The Store of Quality — Blaine's GENERAL MERCHANDISE

Almost a War in Campbell

This picture shows last week's PRESS being read by one of Campbell's leading citizens. The man is a bit excited, but trying to speak calmly. He is saying:

"This ad of Blaine's Store contains a good thought. It suggests that some housekeepers are in danger of not putting up enough fruit because they are scared out by the high price of sugar. Now my idea is that fruit is one of the most necessary foods. If you haven't canned fruit you'll have to buy something to take its place—something more expensive, probably. Now, listen! I want fruit of some kind every day; and believe me, if there isn't enough fruit put up in this house to last until next spring there'll be a row around here that will make the roar of a German "42" seem like the murmer of an eolian harp!"

Fortunately this gentleman's wife has promised to get busy right away. She is going to put in an order at Blaine's for more Jars, Sugar, etc. Thus has war been averted in Campbell.



Something New

Latest Antiseptic Tooth Brush Holder. Keeps the Brush Clean and Sterilized.

A New Tooth and Mouth Wash at the

Orchard City Drug Co

We guarantee the milk we sell you perfect protection from dust and dirt, right up to the time you use *the last drop.*

We have adopted

The third annual apportionment of state elementary school funds accumulated during the school year ending June 30, 1916 has been made. The rate to districts will be 67 cents per pupil, unless the superintendent has money on hand, in the unapportioned school fund.

There are but four counties in the state that receive larger amounts of this fund than Santa Clara. They are Alameda, Fresno, Los Angeles and San Francisco. Of this apportionment, $221,770.00, Santa Clara county receives $7,164.31.

NYE'S STUDY OF THE BEE

Humorist Went Almost as Deeply Into His Subject as His Subject Did Into Him.

I love to study bees, and once kept bees myself. I often think of what a late writer has said, "that within so small a body should be contained an apparatus for converting the various sweets which it collects into one kind of nourishment for itself, another for the common brood, glue for its carpentry, wax for its cells, poison for its enemies, honey for its master, with a proboscis as long as its body itself, microscopic in several parts, telescopic in its mode of action, with a sting so exceedingly sharp that were it magnified by the same glass which makes a needle's point seem a quarter of an inch across, it would yet itself be invisible, and this, too, a hollow tube—that all these varied operations and contrivances should be included within half an inch of length, and two grains of matter, is surely enough to crush all thoughts of atheism and materialism." The queen, during the propagating season, lays as high as two thousand eggs in a day, and I have given much thought to the grafting of the queen bee upon the Plymouth Rock hen, with a view to better egg facilities, but so far met with but little success. My experiments have been somewhat delayed by the loss of time in taking the swelling out of myself after each perusal of the bee character in his or her home life. A writer says the best way to ascertain the location of the queen is to divide the swarm, after which it will be noticed that the one having the queen will quietly settle down again, while the other portion will become very restless indeed. I tried this myself, and noticed that they were very restless. They also communicated their restlessness to me. All of us got restless. The drones are the male bees of the hive. They do no work, except to act in a parental capacity and vote. They have no stingers, but in its place they have a good appetite and a baritone voice. They are destroyed by the workers soon after the honey season, and the widows have it all their own way. About nine-tenths of the hive are workers, or females, say, twelve to fifteen thousand. These are the busy bees referred to in books. They get up early in the morning, eat a hasty meal, and go out looking for honey. They fly with great force, and as straight as a bullet. Sometimes they try to go through a man on their way to the hive, but only get part way.—Nashville Advocate.

Harvard's New Degree.

Anticipation aroused by Harvard's announcement of a new degree, that of Ph. D. in business economics, are already being rapidly dissipated. Instead of being a sign of proficiency in standing Wall street upon its head, the new degree turns out to be meant for teachers rather than practitioners of business. The academic trail, as usual, is over it all. There are ominous remarks about the free use of books in French and German, and something about being "well grounded" in European and American history. The "fields" listed for the general examination of the candidate for the new doctorate are more to the point, although economic theory is required for everybody instead of for those only who do not intend to go into business, and there is nothing in the description of the courses in marketing, foreign trade, industrial management and labor problems, and money and banking, about laboratory work. It is but too evident that our most advanced universities still look upon their business courses as they have long looked upon their law courses—as convenient means of imparting knowledge merely. If Harvard wants to make a hit, let her induce some millionaire to put up a stock exchange in the Yard, which may do for thousands what her medical school and her courses in play writing are doing for a comparative handful.—New York Post.

Tiny German States.

Some of the German states are of lilliputian size, as is evidenced by the act that it is quite possible to visit leven of them, including two kingoms, two duchies and three principalities, in an easy walk of four and half hours.

A good walker, starting from Steinach, in Bavaria, will arrive in half an hour at Lichtentanne, which is situated in Saxe-Meiningen. Thence the road proceeds in one and a half hours to Rauschengesees (Reuss, elder branch), after which in a few minutes Gleima, in Schwarzburg-Rudolstadt, is reached.

Half an hour's walk brings the pestrian to Altengesees (Reuss, youngbranch). An hour farther on lies nitz, on Prussian soil, and the tage is another hour's stroll, up at Saalthal, Saxe-Alten-

Peasants of China

THIS is being written in China, where, at the moment of writing, there is much talk of discovering and following the will of the people on the question of monarchy or republic. Those who best know China can only smile. There is something amusing in the idea of discovering the will of China's millions of peasants on a subject of national moment, says a writer in the Dundee Courier.

The patient Chinese husbandman knows nothing and cares less whether he is ruled by a president or an emperor. His opinion on any matter of national importance will not be discovered within the next 100 years. He has to discover it himself before others can do so. At present it does not exist. His one idea of good government is to be left alone in peace without being too greatly robbed by officials. If his crops are good he leaves politics, whether local or national, to those who are interested in them. For his part, he has less than no interest.

The Chinese peasant is a man almost entirely without ambition. He has two ruling passions of life, and these are so closely allied that they may be described as one, The acquisition of wealth is out of the question for him. To him a Mexican dollar—which is worth about 1 shilling 9 pence— is a vast sum, and twenty of them constitute a fortune. If he earns the equivalent of two pence a day he is doing famously, but you cannot save much off two pence a day. Since he cannot amass wealth, therefore, he sets himself to amass a family, if one may so phrase it. The strongest ambition of his life—perhaps passion would be a more accurate term—is to get married and to rear a large family, preferably of boys. Second only to that is his desire, having reared his family, to have the members of it married as well. And because marriage is the beginning and end of the existence of a Chinese peasant the matter is taken with quite tremendous seriousness. He marries young. Rather, he is married young, for the contracting parties are not the two most immediately concerned, but their parents.

BURYING A PLAGUE VICTIM.

The contract is drawn up long before the young people are of a marriageable age, and past it the young people cannot go if they wish. But they seldom wish. The young man is content with the choice made by his mother. One girl is as good as another to him, so always she can rear a family. What women think in China matters nothing to any one; among the peasant class, that is to say. Yet for all his passion to get married, the young man seldom dreams of providing a home for his bride. He is content to take her to his father's house, and to rear his children there. The time will come, of course, when the little home will become too small, but it serves him for a very long time first.

Everyone a Worker.

From this custom of two or three generations living together springs the fact that everyone, from the youngest to the oldest, does some kind of work to help. A little tot of three may be seen gathering bits of stick; the tottering old grandmother is generally found trying to weave or spin. Chinese youngsters appear to have no real childhood. They do not laugh as do our children, or as do the children, say, of our Japanese allies. In point of fact, one has to visit Japan to find children who appear to make the most of life. They laugh all day and every day, and they never seem to find anything worth crying over. Yet it must not be supposed that, because the Chinese child works at an age when our children can do little more than toddle, life for them is one of gloom. In their own way, they are perfectly happy while they are working, and one doubts whether they would be anything like so contented if they were set to play as we know play. The same holds of the wife of the peasant. Day after day she is forced to work, and very often the burdens she is forced to carry are disgracefully heavy for a woman. But what else is there for her to do? She has no housework to perform. She cannot read. She is not educated, and she has not been taught to think. If the right to work in the fields were denied her she would be the most miserable creature alive. These things must be viewed from the Chinese and not from the western point of view.

Every writer on Chinese matters makes mention of the filial respect displayed by Chinese young people. Yet it simply does not exist. They are misled by the fact that ancestors are worshiped and old people revered. It has to be said of the Chinese peasant that he never allows his old father or his old mother to starve so long as he has a handful of rice to share. There are no poorhouses for old people in China. They are not needed. But between child and parent there is no sign of respect. Men and women in China are not respected until they are either dead or approaching death. They they become tremendously important. A woman is regarded as a fool and a tool while she is still young and vigorous. She is venerated and her opinion gravely regarded when she is in her dotage. But no children on earth, perhaps, talk to their parents as do Chinese children; and the manner of their back-chat, bad as it is, is as nothing to the nature of it.

You have to understand that swearing in China is an art. I grant you that you have some "professors" in Dundee; I have heard them, and I appreciate their proficiency. But they have to hide their diminished heads in front of a Chinese—even a Chinese youngster.

Man Without Sympathy.

One characteristic of the Chinese peasant is his indifference to pain. He may be badly smashed up, yet he will cling to life with a tenacity that pulls him through where a European would go under. I saw a man the other day who fell thirty feet down the hold of a ship. One side of his face was terribly battered. Two of his ribs were broken and one arm was badly damaged. A European would have been carried instantly to hospital. His one anxiety was to be allowed to return to work and his description of those who would not allow him to do so lacked nothing in point and directness and was sufficiently comprehensive to include their ancestors, existing relations and heirs forever. He simply could not understand what all the bother was about.

From this indifference to pain, again, springs a want of sympathy with another sufferer. A man may die on the roadside without the slightest notice being taken of him. Let his relatives take care of him. If he is dying, why trouble with him? It is the business of the authorities to cart away the corpse. Why should anyone worry over him? For the matter of that, of course, if the case is one of plague, say in Hongkong (where the laboring class is only a little better than the peasant class in China), a dying man will be taken into the street and left there. If that cannot be managed the body will later be slipped out quietly and left some distance away. If it is kept in the house the authorities will come round with brushes and pails and disinfectants and other foolish things, and clean the house and fumigate it, and generally annoy the inmates. The idea of annoying living people because of a man who is dead is ridiculous!

He has one strong saving grace, however. If he has not come too much in contact with foreigners, and so become contaminated, he is an honest business man. Order rice or tea from one of the more important peasant farmers and get a sample, and he will send rice or tea exactly to sample. Therein he differs from the Japanese, who has no sense of honor in business, and is seven kinds of a rogue,

PECULIAR EYES OF FISHES

Scientific Study Has Demonstrated Many Facts Not Hitherto Known to the World.

In the effort to discover why fishes are so near-sighted, scientists have been making some remarkable experimental studies of their eyes. One of the many interesting facts which these studies revealed was that fishes' eyes compared with human eyes are relatively large. The length of the eye of a fish is ordinarily about one-twentieth of its length, while the length of the eyeball of a man is from a sixtieth to a seventieth of his height.

The eyes of fishes are in constant use except when they are asleep. Most fishes have no eyelids, their eyes being protected from injury by a shiny material or by a thick transparent skin. The puffer, or swellfish, which habitually burrows in sand at the bottom of the water, has eyelids which cover the eyeballs when closed, the lower eyelid being larger than the upper.

In the experimental work the eyes of normal fishes were first examined with the retinoscope, then by electrical stimulation the focus was changed from distant to near objects.

It was found that, contrary to statements sometimes made, the eyes of fishes when swimming were focused for distant vision. Fishes are able to focus their eyes on near objects—as close as four inches—by the action of the superior and inferior muscles; they have no ciliary muscles. It was found possible by operation on the oblique muscles to make the fish near-sighted, far-sighted, or astigmatic.

LESSON FROM THE FLOWERS

Gentleness and Tolerance Are Taught by Sweet Things of Garden and Field.

What a freedom from cares and perplexities one finds among the flowers. They are never unkind; you may be with them from morning till night and not have one bitter memory or disagreeable thought to take with you to your pillow. A tiger lily won't dig its claws into your breast, the calla lily will not prolong her call indefinitely. The sweet william's honeyed personality is honest and sincere; sweetness that will not under fancied provocation turn into vinegary revenge.

The snowdrops will not chill you with cold words and looks. The dogwood will not bark at you or dog your footsteps. There is a clump of the beautiful variegated variety bending over a quiet corner of the fish pond, its pretty leaves reflected in the water. It has no canine faults, but all the canine virtues, fidelity—no running away from the mistress to follow strange masters.

Jack in the pulpit does not preach too loudly or make awkward gestures, taking your mind insensibly from the heavenly message he is striving to deliver and which your soul desires to grasp, the mind being willing but the body weak.

The Swiftest Thing We Know.

So far as we know, Galileo was the first to try to verify the suspicion that light was not really free from the conditions which trammel ordinary motion. In his endeavor to measure the speed of light, Galileo stationed two observers a couple of miles apart at night each armed with a dark lantern. One of them suddenly darkened his lantern, and the other was instructed to do the same, the moment that the first light disappeared. Galileo reasoned that if light really took a finite time to cross the distance, it would be measured by half the interval between the darkening of the first observer's lantern and the disappearance of the second light from his gaze. The argument was perfectly sound, but as the time in question was about one-fifty thousandth part of a second, it is no wonder that the observer failed to detect it. Yet it is on a quite similar plan that all the modern experimental determinations of the speed of light have been made.

Surely Prize Scarecrow.

An American tourist had been boasting again in the village inn, says London Tit-Bits.

"Talking of scarecrows," he said, with a drawl, "why, my father once put one up, and it frightened the crows so much that not one entered the field again for a year."

He looked triumphantly around his audience. Surely that had settled those country bumpkins.

But he was to meet his match.

"That's nothing," retorted one farmer. "A neighbor o' mine once put a scarecrow into his potato patch and it terrified the birds so much that one rascal of a crow who had stolen some potatoes came next day and put them back."

The Locust as Human Food.

The curious species of insect life, known as the locust, which, according to its family traditions, visits and pays its respects to the outside world once in 13 or 17 years, has furnished much food for discussion among scientists, students and farmers. In addition to these there are others who anticipate with pleasure the advent of the locust, for whatever might be said about the strange creature, in spite of its destructive ability and its appetite for choice foliage, it has one good quality which was probably discovered by no less a person than John the Baptist when he decided that specimens which he found in the desert were good to eat.

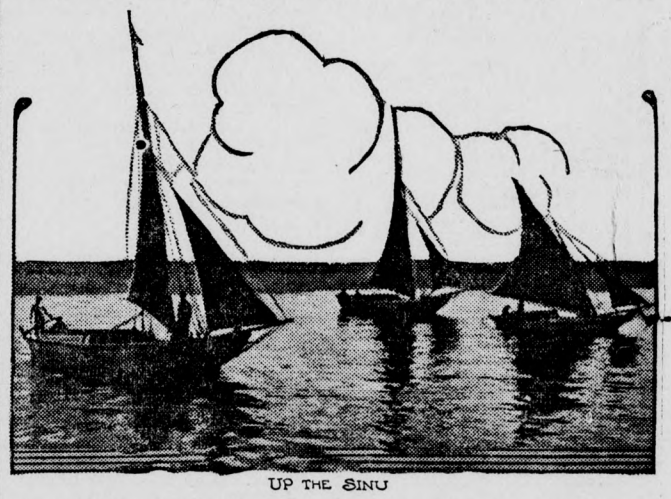
Woman in Colombia's Jungles

MRS. FRANK ANDERSON of New York, who has followed her explorer husband into the densest of jungles, has recently returned from a most toilsome trip into the interior of Colombia. Mr. Anderson is geologist for the Standard Oil company, and took four young assistants with him, besides his wife.

"I was the first white woman to penetrate that part of the jungle," says Mrs. Anderson. "As our little steamer went up the Sinu the children ran out from the mud and bamboo houses calling, 'Mira! Mira! Americana!' I used to feel that I was on exhibition all the time, and it was very hard to dress the part, for my clothes wilted and the very hairpins rusted in my hair. It was so hot and damp that we had to take off all the buttons and metal buckles for fear of rust spots, and our shoes fairly mildewed on our feet.

"But by far the most interesting part of the trip was the voyage up the Sinu on the little 75-foot steamer. There was only one camorote or stateroom and only fifty feet of deck space for the sixty passengers to swing their hammocks. The captain gave me his stateroom, since I was the only woman on board; but with the others it was first come, first served. The hammocks were swung one above the other like bunks. Some of the men slept on deck and some on the table where we ate! We had our own bedding, of course, and I got through the 110 miles in comparative comfort.

"We found a beautiful house waiting for us in Lorica, built in the old Spanish mission style round a wonderful patio. Unlike most of the houses, it was two stories high. It belonged to the principal family of the province, who owned the electric light, butter and ice plants.



UP THE SINU

Life in Lorica.

"From my windows I could see the women washing in the river, carrying their bundles of clothes down to a convenient stone and paddling them with boards, then spreading them on bushes to dry. Everything we needed in the household was brought to the door by natives. Live chickens and turkeys, yuccas, mangoes, the yellow fruit that tastes rather like a sweet plum, cocoanuts and ilucas are all poled down the river in canoes. Then there is cocoanut flour bread rolled out into thin sheets like Jewish matzos. I liked to go down to the wharf on market days, though the native ladies never do. Even the cloth for their dresses is brought to the house in bolts by the servants.

"As a matter of fact, they wear only a jacket and skirt, it is so very hot, less than nine degrees from the equator. Children, even of the better class, go entirely without clothing up to five and six. And there are so many of them! Fifteen is not a particularly large family, and I met one charming woman who had twenty-two. Grandparents, father and mother, the married sons and daughters and all the children live together in the same families with all their children in absolute harmony. They keep a great many servants, of course, for wages are very low, and treat them almost like members of the family.

"The lower classes are a mixture of Indian, Chinese and negro, but the aristocrats are almost pure Spanish. They are charmingly friendly—much more so than the Mexican women—and I became very fond of some of them. They never could understand why I wanted to go out into the jungle, but they were too polite to say so! They were very pretty in their white jackets that looked almost like our middies and the dainty little shoes, of which they are so proud. Even the native women who go barefoot have small, slender feet and the most beautiful long hair. It is almost always prettily dressed in spite of the fact that they carry everything on their heads. I have seen a woman with two five-gallon oil tins filled with water on her head, but she only walked a little straighter than usual.

Going Into the Jungle.

"I never shall forget the start on my own first trip into the jungle. I wore a divided skirt, in which the natives were much interested. They were more dressed than usual themselves, and all the Indians we met retired as soon as they saw me, and came back with skirts of bark and leaves.

"We had the usual hammocks, bags of food, water barrels, mosquito nets and cook tent loaded on the burros, and had taken along a special camp tent for me in case we didn't find the usual empty house; but we only had to pitch it once in all the week we were gone.

"The first night we camped in a little open space, and the cook soon had a fire going, with bacon and yamas toasting over it. Every bit of drinking water has to be brought from a safe place and then boiled. But we didn't have to live on beans and bacon. Even the woods Indians raise fowls and cattle. There is not wild game. You have to learn to eat fresh-killed meat; but you have to do that anywhere in that country. It is too hot to keep anything even over night. My khaki suit was soon streaked with dust and the heat from the horses, but as there was no one to see it I did not mind.

"We did have some shooting, for the second day out a fifteen-foot boa constrictor crossed our path. One of the men shot it at once and the natives skinned it. The colors in its skin were wonderful.

"They were nothing, however, to the colors of the flowers. The tall grass and the trees made it too dark in most places even to take pictures, but wherever there was a rift of sunlight the flowers burst forth. There were the wonderful pink accasia bushes and a sort of bird of paradise flower with one blue petal—the other yellow and red. The royal poinsetta grew tall as a maple with its perfect blooms and long pods—and there were beautiful scarlet and yellow orchids. We found some very rare specimens. While the men were looking for oil I looked for orchids. Sometimes I would have to be contented with an armful of scarlet hybiscus, but usually I found what I was looking for.

"I know something about geology, of course, and there were many interesting formations. Suddenly the heavy silence would be broken by the cry of the machete man as he saw light ahead, and we would come out on an open space with perhaps a half dozen mud volcanoes in active operation. The men got off to examine every strange or promising formation, of course. I often went with the party after that first trip during the months we stayed in Lorica.

Up the Rio de Oro.

"Later we went up the Rio de Oro in the launch as far as the country of the savages east of Bogota. They have never been disturbed since the Spaniards drove them into their mountain fastnesses and they shoot at intruders on sight with poisoned arrows. We saw some of them like dark pieces of bronze among the trees, but did not go too near.

"The savages may have been afraid of the puffing of the launch, for they did not trouble us.

"The woods Indians greeted us with the greatest interest, however. As soon as we made our camp they would manage something in the way of clothes and then appeal with fruit and fowls to sell. They were wonderfully skillful and in a few hours they had cut down and made a tree trunk canoe when we came out on the banks of Rio Sardinata. It was hollowed out, chipped off and a canvas shelter arranged for me almost before we had finished our arrangements to send back our horses. The Indians with their long poles took us down not only the Rio Sardinata but the San Miguel. On the Rio Buzio, a tributary of the Catatumbo, we saw natives killing alligators along the banks. There is no swimming in these streams, for they are full of alligators and sharks."

Disaster at Once.

She was an old lady. It was her first holiday excursion, and she entered the compartment of a railway carriage with much trepidation, and sat down rather gingerly in one of the corner seats. Just as the train was getting into motion the engine gave a shrill scream, or whistle.

Thereupon up jumped the old lady, and, with a startled ejaculation, exclaimed:

"There they are noo, ower a pig at the very start!"

Chamberlain's Recipe for Success.

One night at Lady Jeune's house Joseph Chamberlain said to me that he believed any man of even moderate endowment could attain any given aim which he set before him with unremitting effort and "enduring to the end." To my question, "Why, then, do so many men fall short of their ambitions?" he answered: "They come to the place where they turn back. They may have killed the dragon at the first bridge and at the second, perhaps at the third; but the dragons are always more formidable the further we go. Many turn back disheartened, and very few will meet the monsters to the end. Almost none is willing to have a try with the demon at the last bridge; but if he does, he has won forever."—Princess Lazarovich Hrebelianovich (Eleanor Calhoun) in the Century Magazine.

I OWE MY HEALTH

To Lydia E. Pinkham's Vegetable Compound.

Washington Park, Ill.—"I am the mother of four children and have suffered with female trouble, backache, nervous spells and the blues. My children's loud talking and romping would make me so nervous I could just tear everything to pieces and I would ache all over and feel so sick that I would not want anyone to talk to me at times. Lydia E. Pinkham's Vegetable Compound and Liver Pills restored me to health and I want to thank you for the good they have done me. I have had quite a bit of trouble and worry but it does not affect my youthful looks. My friends say 'Why do you look so young and well?' I owe it all to the Lydia E. Pinkham remedies."—Mrs. ROBT. STOPIEL, Moore Avenue, Washington Park, Illinois.

We wish every woman who suffers from female troubles, nervousness, backache or the blues could see the letters written by women made well by Lydia E. Pinkham's Vegetable Compound.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

UGH! A DOSE OF NASTY CALOMEL

It salivates! It makes you sick and you may lose a day's work.

You're bilious, sluggish, constipated and believe you need vile, dangerous calomel to start your liver and clean your bowels.

Here's my guarantee! Ask your druggist for a 50 cent bottle of Dodson's Liver Tone and take a spoonful tonight. If it doesn't start your liver and straighten you right up better than calomel and without griping or making you sick I want you to go back to the store and get your money.

Take calomel today and tomorrow you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Dodson's Liver Tone tonight and wake up feeling great. It's perfectly harmless, so give it to your children any time. It can't salivate, so let them eat anything afterwards.—Adv.

SPECIFIC ACTION OF GERMS

Results of Some Interesting Experiments That Were Made by Famous New York Physician.

In a lecture before the New York Academy of Medicine, Doctor Rosenow gave an interesting and convincing account of his experiments with germs taken from diseased organs in various parts of the body. He showed that bacteria taken from ulcers of the stomach, appendices, infected gallbladders and rheumatic joints, when injected into animals in the majority of instances caused infection and inflammation in the localities corresponding to those from which they had been taken. For example: Out of 59 animals injected with the germs taken from cases of appendicitis, 41 developed appendicitis. Out of 79 animals injected with the germs from ulcer of the stomach, 50 developed ulcer of the stomach, 47 showed hemorrhage. Out of 27 animals injected with germs from inflamed gallbladders 22 developed gallbladder affection. Out of 71 animals injected with germs derived from cases of rheumatism, 47 developed joint affections, 33 developed inflammation of the lining of the heart, a frequent complication of rheumatism, 33 developed myocarditis, inflammation of the heart muscle, and 19 developed pericarditis, inflammation of the membrane surrounding the heart, 28 kidney affections, 19 peritonitis.

DON'T GET RUN DOWN,
Weak and miserable. If you have Kidney or Bladder trouble, Headache, Backache, Dizziness, Nervousness, and feel tired all over, get a package of MOTHER GRAY'S AROMATIC LEAF. It never fails. Sold by all Druggists or sent by mail for 50c. Sample sent FREE. Address, The Mother Gray Co., Le Roy, N. Y.—Adv

Unstable Moon.

The celebrated observatory at Greenwich, the place from which we reckon longitude, was founded by Charles II in 1675, mainly for the purpose of investigating the movements of the moon in the interests of navigation. Although in the intervening two and a half centuries astronomers have worked at the problem, the moon has not yet become entirely amenable to their mathematics. The astronomer-royal of Great Britain, in his report of the work at Greenwich during the past year, calls attention to the increasing deviation between the calculated position of the moon in the sky and its real position as shown by the Greenwich observations. The deviation has lately been growing in a serious manner. The error last year was more than twelve times as large as the error twenty years ago, and the average annual increase during the two decades has amounted to half a second of arc in longitude. The reason that astronomers have failed in getting exact results from calculations based on dynamical laws of gravitation is possibly the existence of some attractive force that they have not yet discovered, although the result may also be affected by the true shape of the earth, which still awaits accurate determination.—Youth's Companion.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

Daily Housework Outline.

An outline of a system of housework was the request made not long ago by a bride-to-be, who wished some directions published for her guidance in housekeeping. The variation in the needs of different households makes a universal rule impracticable, as was suggested to the inquirer at the time; but she may find some help in a daily outline given by Miss Parloa, a noted authority on household matters. Miss Parloa says: "Make the fires, air the dining room and hall. Prepare the breakfast and set the table. Air the bedrooms while the family is at breakfast. Remove the breakfast dishes; put away the food. Sort the dishes and put to soak all dishes and utensils that have had food in them which is liable to stick. Put dining room and sitting room in order, airing them well. Wash dishes, put kitchen and pantries in order. Prepare dishes that require slow cooking and put them to cook. Make beds and put sleeping rooms and bathroom in order. Trim lamps. Dust halls and stairs; sweep piazzas."

Pneumonia? Apply Hanford's Balsam. Rub it on and rub it in thoroughly, until the skin is irritated. Adv.

Few Women Who Have Plenty to Do Have Fits of Blues

By LAURA JEAN LIBBEY

(Copyright, 1916.)

We have many goodly days to see
The liquid drops of tears that you have shed
Shall come again transformed to orient pearl;
Advantaging their loan, with interest,
Oftentimes double gain of happiness.

Was there ever a woman—no matter how many blessings surrounded her—who did not give herself up completely to a fit of the blues now and then? They have indulged this habit—for it is nothing else than a habit—from girlhood up until at last it has taken such a hold upon them they are unable to shake off these depressions.

The splendid army of working girls should be an example of cheerfulness to the women in good homes who have nothing to do but nurse their grievances.

These working girls, each and every one, know the value of a smile and how to radiate cheerfulness. If you put the question to them whether or no they ever have fits of the blues, the smile will die out of their eyes as they answer gravely that in the business world there is no place for the girl or woman who gives free rein to fits of melancholy and that good nature, a happy mood and a genial disposition in general are the assets she depends on not only to keep her position, but to forge ahead. There are too many helpless ones at home, usually, dependent upon her to encourage fits of the blues.

It is only the idlers or those who have little or nothing to do who rail secretly over really insignificant affairs. The women wedded to men who drink up the greater part of their wages, leaving the family at home to fight starvation, ejection from the home that shelters them and with insufficient clothes to cover them, bravely fight the demon discontent, put their shoulders to the wheel and live and dream of the glorious duties they are performing in keeping their children at school and the golden reward that will surely be theirs later on.

The childless wife, who has longed for the clasp of little arms around her neck and childish, loving lips pressed to her own, encounters battles which she must fight bravely to outwit attacks of the blues. Philosophical women accomplish this by answering the cry of their lonely hearts with this truth: Whatever should be, will be. Whatever is, is best. He who denies their earnest prayers knows best.

Even those who have known and lost love can be made to realize that the heart has been enriched by it through memories of the hours when it was tenderest, truest and at its best.

If but one blessing is given us, we should be grateful for that one, shut out discontent and cultivate a happy disposition, though we have it not, and always look on the bright side.

Timely Hints for Poultry Growers.

The best feed for little turkeys is dry grain chick feed, but it must be free from mustiness or moldiness and be clean and sweet.

Weaklings should never be tolerated in the chicken coop. Kill and bury them, for otherwise they will be the first to become infected and later die.

More ducks are killed by unnecessary handling, chilling and underfeeding than all other causes combined.

Be sure that little ducklings always have plenty of water to drink, especially at meal time, and deep enough so that they can get their heads into it up to their eyes.

Eggs to be used for hatching should not be subjected to either abnormally high or low temperatures. If they can be gathered before they have time to cool after being laid it is all the better for their hatching qualities. From 50 to 60 degrees is the best temperature for storing hatching eggs.

Little chicks should be protected from cool, damp surroundings. Nothing is more detrimental to their health and more certain to bring heavy mortality than to let them out in the wet grass early in the morning.

When shipping live poultry to market always allow sufficient room and use a coop sufficiently high, so that the fowls will not suffer from cramped positions while on the road. Any discomfort reduces their weight and costs the producer a certain amount of money.

Avoid feeding chicks food that has been in stock so long that it is moldy. It is bound to cause much trouble.

To get the most out of your flocks you must adopt present-day methods, so as to be on an even footing with your competitor.

The early hatched pullet is the one that begins to lay early in the fall, when eggs are high in price.

Collars Make Blouses.

Do you know how to "trim up" the plain blouse and make it become your individual style? Get a collar in white chiffon or sheerest organdie which, in turning back, covers the nape and the sides of the neck, runs flatly across the shoulders and straight down over the bust, forming a slender "V" opening below the throat. This collar is bordered with pin-tucked self material, straight on its outer edge and widely scalloped along the fine, embroidery-outlined inner edge. Another blouse-dominating collar has a tapering, narrow turnover coming high against all save the front of the neck, and widened by an extremely broad frilling of the plaited material, a-jour hemmed. In crepe de chine this second collar is extremely practical as well as dainty.

Education Sometimes Costly.

For the education of the 325 seniors at Yale college slightly more than $1,000,000 has been required. While it is figured that $4,073 for the entire four years is the average cost a student, one man alone has spent $15,000 in the process of going through college, while another has required only $500 to provide his education. In this connection it is a noteworthy fact that 120 members of the class have earned their way through college either in part or in whole, having earned to date a grand total of more than $300,000.

A Few Things That You May Not Know.

A hand-operated machine to knead the stiffness out of leather has been invented by an Oklahoma man.

Included with recently invented sun goggles is a shade to protect a wearer's nose from sunburn.

Sixty miles of thread woven from the fiber of a species of Italian nettle weighs but two and a half pounds.

Sharp points in the inside of the lid of a new egg cup cut the shell away without disturbing the contents.

About 1,729 miles of railroads in the United States have been electrified to about 1,278 in all foreign lands.

Bombay averages more than seventy-two inches of rain a year and gets most of it within four or five months.

A powerful machine has been built in Germany for compressing scrap metal into more easily handled bales.

A wall tie that grips half a dozen bricks instead of two, as customary, has been invented by a Scotch builder.

Leather and canvas covers to be laced over automobile springs to keep them clean and dry have been patented.

According to a British scientist, weight for weight, macaroni is as valuable a flesh building food as beef or mutton.

In the Movies Comedy in One Reel

HOT WATER AND "ANURIC" BEFORE MEALS---AND HEALTH

All people in America and especially those who are past middle age are prone to eat too much meat and in consequence deposit lime-salts in their arteries, veins and joints. They often suffer from twinges of rheumatism or lumbago, sometimes from gout, swollen hands or feet. Such people are not always able to exercise sufficiently in the outdoor air or drink enough pure water in order to sweat freely and excrete impurities thru the skin. Dr. Pierce has conducted experiments and thoroughly tested a uric acid solvent at his Invalids' Hotel and Surgical Institute which he is convinced is many times more potent than lithia—this he named "Anuric." It can be had at almost all drug stores by simply asking for Dr. Pierce's Anuric for kidneys or backache. It will overcome such conditions as rheumatism, dropsical swellings, cold extremities, scalding and burning urine and sleeplessness due to constant need of getting out of bed at night.

Our grandmothers have told our mothers and our mothers have in turn instructed us that in case of sickness, resort to Dr. Pierce's dependable household prescriptions. These medicines as put up for sale by druggists have never been recommended as "cure-alls," but only as superior remedies for certain common and easily-recognized diseases. Had these medicines been adopted to all classes and forms of chronic diseases there would have been no necessity for organizing a competent staff of expert physicians and surgeons, to act in the treatment of difficult, obscure and complicated cases of chronic diseases, as Dr. Pierce maintains in his Invalids' Hotel and Surgical Institutue. Of his home remedies the most widely known are his "Favorite Prescription" for womanly troubles and run-down conditions peculiar to the womanly sex; his "Golden Medical Discovery," the greatest of all herbal system tonics and vitalizers, for stomach, liver and blood disorders, as well as his "Pleasant Pellets," the tiny, tonic laxatives, overcoming constipation and cleansing the system of poisons and accumulations in the bowels.

FAVORITE DISH IN MEXICO

Hot Tamales Worth Introduction Into American Kitchens—How They Should Be Made.

The Mexican recipe for making hot tamales is to cook one or two chickens until tender. Remove all meat from the bone, shred it in the chopping machine and add to it the liquor in which the chicken has been cooked. This is seasoned with any desired condiments, especially red pepper, and thickened with cornmeal. The rolls are about the size of link sausages and they are wrapped in the inner husks of green corn. Tie the husks with strings at each end and boil them for three hours. It is best to taste the preparation before adding meal to note whether it is rich or needs more seasoning, allowing for the meal to be added, which will take up the sharp flavor.

To make tamale pie, take one pound of hamburg steak or left-over meat cut fine, add one level cupful of seeded raisins, one dozen stoned olives, salt, pepper and red pepper to taste. Stew until tender and thicken with one tablespoonful of cornmeal. Then stir one and one-half cupfuls of cornmeal into boiling salted water, add one tablespoonful of shortening and cool to the consistency of mush. Line a buttered baking dish with about two-thirds of this mixture, pour in the meat, cover with the remaining mixture and bake for one-half hour.

Sometimes Apply It Lightly.

For cuts, burns, scalds, sores and open wounds always apply Hanford's Balsam lightly, but be sure that it covers and gets to the bottom of the wound. A few light applications are generally all that is needed to heal this class of difficulties. Adv.

Music by Wireless.

A young California inventor has designed an apparatus whereby selections played on a phonograph have been transmitted to several neighboring homes equipped with special receiving instruments, Popular Mechanics Magazine states. In some instances the instruments have been installed in the dining room and by this arrangement the neighbors have been entertained at mealtime. A wireless telephone apparatus upon which the inventor has been working several years is used at his central station. A phonograph, in which the horn is an integral part of the body of the instrument, is used in producing the selections. The slats are removed from the mouth of the horn and within it are placed two ordinary telephone transmitters, from which the sounds are carried by wires to the wireless telephone outfit which, after serving as an amplifier, sends the waves through a cable in the aerial on the roof, whence they are discharged into the air.

The waves are caught by the various receiving stations and conveyed by wires to receivers each of which is fitted with a small megaphone. In several instances head appliances with a pair of receivers were used. In others a single megaphone was sufficient for a group of persons.

For frostbites use Hanford's Balsam. Adv.

Words in English Language.

The English language is constantly growing and almost every person's vocabulary changes from year to year. The first edition of Webster's dictionary, two quarto volumes, published in 1828, contained 70,000 words and this number was increased by several thousand in the second edition of Webster's dictionary in 1840. An edition of 1890 contained 175,000 words and the latest edition has more than 400,000. Many of these are technical, scientific, or for other reasons restricted to limited use, but nevertheless they are words. Obviously an educated man has a larger vocabulary, or command of words, than an uneducated one and a professional writer or public speaker needs more than a day laborer. Shakespeare had a vocabulary of about 15,000 words, but some that he used are now obsolete, while a large number of new ones have been added. Milton used about 8,000 words. It is not likely that any public speaker ever uses more than a few thousand words or the average citizen or man on the street more than a few hundred.

Domestic Discussion.

"My husband accuses me of extravagance. I spent $10,000 last year."

"I wouldn't mind being scolded on that basis. I have to stand for the same accusation on $20 a week."

TYPHOID is no more necessary than Smallpox. Army experience has demonstrated the almost miraculous efficacy, and harmlessness, of Antityphoid Vaccination.
Be vaccinated NOW by your physician, you and your family. It is more vital than house insurance.
Ask your physician, druggist, or send for "Have you had Typhoid?" telling of Typhoid Vaccine, results from us, and danger from Typhoid Carriers.

FOSSIL FOREST IN AMERICA

Yellowstone Park Contains One of the Most Remarkable of Natural Curiosities.

Remarkable fossil forests exist in Yellowstone park, the most remarkable, it is believed, of the several fossil forests which have been discovered—there are others in Egypt, in California and in Arizona—because in the Yellowstone most of the trees were entombed in their original upright position and not found recumbent and scattered about the ground.

In Arizona, for instance, the fossilized trunks have evidently been carried a long distance from where they originally grew.

In the Yellowstone the trees now stand where they grew, and where they are entombed by the outpouring of various volcanic materials.

Now as the softer rocks surrounding them are gradually worn away they are left standing erect on the steep hillsides just as they stood when they were living; in fact, it is difficult at a little distance to distinguish some of these fossil trunks from the lichen covered stumps of kindred living species. Such an aggregation of fossil trunks is therefore well entitled to be called a true fossil forest.

It should not be supposed, however, that these trees still retain their limbs and smaller branches, for the massive volcanic material falling on them stripped them down to bare, upright trunks.

... table cloths, napkins and ... at Smith's.

Off for Chesapeake

Mr. and Mrs. Ralston Alison gave an informal reception at their pretty home Tuesday evening for the old time friends of the W. L. Beacock family. The party was in the nature of a farewell as they left this week for an extended tour of this state before starting to their future home on Chesapeake Bay. They will see San Diego, Los Angeles, Yosemite and Shasta and go East over the Lincoln Highway. Carl will accompany them until his school opens at Keyes. This family has been earnest workers in the Methodist church for some time and they will be greatly missed by their many friends. All wish them success in their Eastern home.

Growers Must Organize

There was recently organized in St. Louis the National Apple Growers' Association. This organization is promoted by the largest and best known apple growers of the Middle West and it aims to promote a wider distribution and consumption of apples. The association proposes to operate along lines somewhat similar to those in use by the California Associated Raisin Company in marketing the California raisin crop. The market relationship existing between apples and prunes is much closer than many prune growers realize. When apples are plentiful not nearly as many prunes are used as when apples are scarce. The apple association, forming, will undoubtedly do all in its power to increase the consumption of apples with the result that higher pressure will be necessary to keep the prune consumption up to normal to say nothing of increasing it. The most effective way to increase prune marketing pressure is for the prune growers to organize as other fruit producers have done and are doing. The coming apple association is just another good reason why the California prune and apricot growers should hasten to the support of the State-wide marketing association of prune and apricot growers now in the process of formation.

Growers Information Bureau.

Install at Saratoga

District Deputy Grand Master Vaughn Lloyd and suite went to Saratoga last evening and installed the new officers for the Odd Fellows. The following comprise the suite:

Jas. G. Burns	Grand	Marshall
A. F. Bulmore	"	Warden
T. A. Robinson	"	Secretary
Robert Scholz	"	Treasurer
H. R. Wade	"	Chaplain
E. W. Preston	"	Guardian.

Plainly Unjust.

"Great rackets this here art bizness is!" exclaimed the maid in an angry voice. "Missus hez got a Venus in ther parlor with both arms broke off above th' elbers, an' then she comes out an' docks me a dollar fer chippin' jes one han'le offen this slazy little old teacup."—Puck.

Talking Shop.

"I don't like to wait on grouchy customers."

"Nor I."

"I hate to have a customer growl at me."

"Mine don't growl," said the dentist, "but they all show their teeth."—Kansas City Journal.

A Real Regret.

Editor—I am obliged to decline your poem with thanks. I am very sorry, but— Poet—But what? Editor—The management insists upon my declining all poems that way.

Funny to Her.

"Is he really a humorist?"

"He certainly is," replied the sweet young thing. "He actually asked me to marry him."

Easy Role.

Johnny—Papa, what is a philosopher? Pa—A man with a good liver, heart, stomach and bank account.—Chicago News.

Honduras Cotton.

Cotton plants require little care in Honduras. They produce cotton in luxuriant abundance nine months a year.

Bogs of Sweden.

The bogs of Sweden, it is estimated, would yield 10,000,000,000 tons of air dried peat.

Supply Fails to Equal Demand

SECRETARY OF INTERIOR, FRANKLIN K. LANE in commenting on the oil land situation in California said:

"To keep three million acres of oil land locked up indefinitely while gasoline is climbing higher and higher is not good sense and plays into the hands of monoply.

"There is no danger of the navy being short of oil, for there are nearly three million acres of public oil lands now withdrawn. Included the rein are two special naval reserves which are practically free from adverse claims. These contain approximately 130,000,000 barrels of oil.

Certain eastern politicians working under the guise of conservation are playing politics and trying to hold up the relief measure recommended by the public lands committee of the U. S. Senate after a two month's investigation.

In the meantime, the development of California oil fields is retarded at a time when it has an opportunity to go ahead as never before and the price of fuel oil goes up another 5 cents a barrel, for the simple reason that the supply cannot equal the demand.

How much longer can this great industry be made the plaything of theoretical and vote seeking politicians? Let us hope not long.

"THANK-YOU-MARM'S" is the new idea adopted in Los Angeles to cause slow driving. This plan is being tried out on grade crossing as a preventative, to save the motorist against his own reckless driving. With all the warning signs and bells many drivers become more or less heedless. With a bump or dip a machine will be slowed to 8 or 10 miles per hour which will give the reckless driver ample time to look for passing cars. This new plan will be put at a four track crossing. Sand pits have also been suggested which would necessitate intermediate gear for crossing. It might be well to install some such retarder at each crossing in small towns as a protective measure for the pedestrians.

REGISTER NOW! All voters who have not registered their party affiliation should do so before July 29. According to the law all voters at the Primary Election must have registered and declared their party in due time in order to vote at all. There are approximately 300,000 voters in the state who have declined to state affiliation or have not registered at all. Those who have registered their affiliation since Jan. 1st need not re-register.

If you are a Progressive, register so, if otherwise register to that party. Do it now.

Local and Personal

The present hot weather is causing much cool thinking.

Choice Skinner Seedling apples. 50c per box. Phone 28F5.

C. C. Brady took a fall Wednesday morning badly bruising his face.

E. C. Merrill spent Monday and Tuesday at Santa Cruz with his family.

Miss Minnie Atkinson went to Santa Cruz yesterday for a week's vacation.

Stanley Smith and wife motored to Santa Cruz, Monday, for the day with friends.

The W. C. T. U. will meet with Mrs. Ida R. Newcomb Wednesday, July 26—2:30 P. M.

Mrs. H. V. Archibald went to Capitola Monday to spend the week with Mrs. R. G. Archibald.

Mrs. Warren McKenzie returned home Wednesday evening after spending a month with her sister at Pinole.

Helen Ralston Alison has suffered more than usual since her throat operation and has required constant medical attention.

Little Ralph Stubbe has been suffering with sore throat the past two weeks and his sweet voice has not been tuned up for some time.

Dr. Merrill is enroute to Campbell and will arrive today, Friday. "Terribly hot in the East," he said, "and will be glad to get back home."

Miss Lucy Vandergon returned home from a two month's sojourn with relatives in Minnesota. She reports a most enjoyable time and that good old state is on the boom.

Mrs. Wm. Donaldson was taken to O'Connor sanitarium Thursday, and underwent an operation Friday. She is reported doing as well as can be expected at this time.

D. R. Oliver of Merced made us a pleasant call last week on his way home. He is well pleased with the country and declared that the latchstring is always out for Campbell friends.

Mrs. Jas. Fablinger and daughters moved to San Jose yesterday that it may be more convenient for the family. Mr. Fablinger and James will remain here until school begins at least.

W. H. Stuart arrived home Saturday from Delta, Utah where he visited his son, Earl. He says crops and climate are good and former Campbellites are doing well on their new ranches.

Mrs. E. R. Kennedy was hostess to twenty-four young ladies Thursday evening in honor of Miss Helen Duncan. After a series of games in which Miss Duncan captured the first place and Miss Stoller consolation, refreshments were served in two courses.

Mr. and Mrs. W. T. Alexander were made very happy last Friday when some old St. Paul friends, Mr. J. C. Clearman and his sister, Miss Margret, walked in and took them by surprise. Mr. Clearman is now an extensive raisin grower at Clovis, Cal. They had been seeing the sights in California motoring for two weeks. Mr. Clearman is greatly interested in the fruit grower's organization and thinks Santa Clara valley is great.

Flower Show Coming

The general committee for the Chrysanthemum Fete met at Mrs. Alison's Tuesday afternoon, considerable business being transacted, and it was decided to allow professional exhibits. Work will soon be begun on posters and pennants for automobiles. Mrs. Miracle and Mrs. Hyde are the committee on the "baby show," and all men about town will have to grow beards to escape being asked to take part.

Babes in arms, and incubators, rompers with little socks and bare legs will be in order.

Any donations towards candy booth, plant booth, or home products will be much appreciated.

New Officers Installed

District Deputy President Mrs. Leona Neff installed the officers of Ada Rebekka lodge Tuesday evening. The officers installed are:

Katherine Burns Noble Grand
Elizabeth Lancaster Vice Grand
Hattie Dunham Chaplain
Omar Posten Rec. Secretary
Mar Shell Fin Secretary
L. L. Merrill Treasurer
Mathilda Carney R S N G
Emma Bulmore L S N G
Lucy Smith Warden
Rose Brown Conductor
Bessie Lloyd R S V G
Emily Duncan L S V G
Lena Robinson Inside Guardian
John Peterson Outside "

The following are of the deputy's suite:

Gertrude Carney	Grand	Marshall
Mabel Bolinger	"	Warden
Hattie Dunham	"	Chaplain
Emily Duncan	"	Rec. Sec
Myra Payne	"	Fin. "
Emma Bulmore	"	Treasurer
Lena Robinson	"	I Guardian
Omar Posten	"	O "

Katherine Burns, Winifred Grizzle, Minnie Neff and Lelia Dodson form the floor staff.

Notice: Probate of Will
In the Superior Court of the State of California, in and for the County of Santa Clara

In the Matter of the Estate of SARAH YOUNG, Deceased.) Notice of Time Set for Probate of Will, and of Hearing Application for letters of Administration with Will Annexed

A document purporting to be the last Will and Testament of Sarah Young, deceased, having on the 19th day of July A. D. 1916, come into the possession of said Superior Court and a petition for the probate thereof, and for the issuance of letters of administration with Will annexed to Ellen L. Adams having been filed by said Ellen L. Adams with me, Clerk of said Court:

NOTICE IS HEREBY GIVEN that Friday the 4th day of August, A. D. 1916, at 10 o'clock A. M. of said day in Department 2 at the Court room of said Court at the Court House in said City of San Jose, County of Santa Clara, State of California, has been set as the time and place for hearing the petition for the admission of said Will to probate, and the application of said Ellen L. Adams for the issuance to her of letters of administration, with the Will annexed, when and where any person interested may appear and contest the same, and show cause, if any they have, why said petition should not be granted.

Given under my hand and seal of said Superior Court this 19th day of July A. D. 1916.

(SEAL) Henry A. Pfister, Clerk.
By Albert J. Newlin, Deputy Clerk.

L. D. Bohnett, Attorney for Petitioner. 3
